

OUR SERVICES

1 SITE SAFETY

Site Safety Management

We provide third-party safety oversight for major construction projects, managing EHS and compliance for owners, developers, or insurers.

Site Safety Audits

We perform site visits to assess safety practices and deliver detailed reports with findings and improvement recommendations.

Safety Staffing

We offer licensed and unlicensed Site Safety Managers, Coordinators, Qualified Safety Professionals, Concrete Safety Managers, F01, and Construction Site Fire Safety Managers.

Safety Plans & Programs

We create and implement tailored safety plans, such as health and safety, environmental, and emergency action plans, suited to various project needs.

Risk Management App

Our safety-professional-designed app streamlines project safety management with customizable checklists, real-time data sync, and comprehensive communication features.

Risk Portfolio Management

Our dashboards and configurable reporting tools facilitate seamless safety and compliance management across projects, enabling performance visualization and trend identification.

OCIP/CCIP Program Management

We offer expert guidance for developing and executing Owner Controlled or Contractor Controlled Insurance Programs, covering costs, coverage terms, claims processes, and loss prevention.

2 ADDITIONAL FIELD SERVICES

WE PROVIDE

Superintendent

Ensures project sites run smoothly by managing daily operations, coordinating teams, and maintaining quality standards, essential for keeping complex projects on track.

Assistant Super

Supports the superintendent in overseeing job site activities, facilitating communication, and problem-solving, which helps maintain productivity and adherence to project timelines.

Project Manager

Oversees project planning, budgeting, and execution, ensuring that all phases are completed efficiently and align with client expectations, vital for keeping projects on time and within budget.

Estimator

Provides detailed cost analysis and project estimates, helping companies accurately budget and secure profitable contracts, critical for financial planning and bid success.

Labor Services

We supply skilled and general labor services essential for adapting to project demands, ensuring tasks are completed efficiently and on schedule.

OUR SERVICES

3 TRAINING & ACADEMY SERVICES

Instructor-Led Safety Training

We offer in-person or live online training led by credentialed industry veterans, including OSHA, NYC Department of Buildings, SST courses, and more, providing fully accredited and transferable credentials.

Self-Led E-learning Courses

Fully online self-paced courses hosted by NextWave's online learning center. Trainees can register for and complete these safety and compliance courses from their computer, tablet, or smart phone.

Full-Service Learning Management System (LMS)

Configurable LMS designed for workforce training and ready to be populated with 500+ e-learning titles from our EHS libraries. Can be white labeled and custom branded. Accompanying mobile app for increased trainee engagement and retention.

Workforce & Career Development Programs

Training programs featuring two or more credential-focused courses as curated by NextWave Safety to aid toward career training and placement as part of a workforce development or higher ed initiative.

E-learning Course Development

Tailored or fully custom e-learning content to be scoped in full and developed by NextWave Safety in support of client educational or business objectives.

4 VIRTUAL REALITY & DEVELOPMENT SOLUTIONS

VR License Subscription

An annual license for one or more VR training modules as supported on the HTC Vive or Meta Quest VR headsets.

VR Content Modification

We modify our existing VR content with adjustments that include, but are not limited to, environments, features, text, assessments, instructor options, language options, and performance report requirements.

Custom VR Content Development

We create tailored VR content to meet client needs for education, learning and development, outreach, or other business goals.

360° VR Interactive Spaces

Our 360° VR technology replicates real working environments for immersive training and outreach, enhanced with interactive elements like hotspots, infographics, videos, and documents.
