

SITE SAFETY & FIELD SERVICES

*Protecting Your Project and Bottom Line through
Innovative Safety Solutions*

Site Safety Management

We specialize in providing site safety services to major construction sites, conducting safety audits and inspections, and developing and filing site safety plans/health & safety plans.

Risk Management

By working in partnership with our clients and applying our comprehensive approach to the construction industry, we strive to support broader risk management and risk assessment.

Safety Plans & Programs

NextWave can develop, submit, and implement customized safety plans and programs, including health and safety plans (HASP), environmental protection plans, noise mitigation plans, logistical plans, tenant protection plans, building contingency plans, site specific safety plans, job specific safety plans, emergency action plans, and accident and loss prevention programs.

We staff and manage licensed Safety professionals, including:

- Site Safety Manager
Required on NYC construction projects 15 stories or higher, over 100,000 sq. ft.
- Site Safety Coordinator
Required on projects 10 to 14 stories while under construction or demolition
- Qualified Safety Professional (QSP)
Projects up to 9 stories or where designated by the DOB or other agency
- Concrete Safety Manager
Required on major building construction projects pouring 2,000 cubic yards or more
- S-56 Const. Site Fire Safety Manager
Required where an SSM or SSC is required or based on DOB designation
